

FULL STACK WEB DEVELOPMENT (MERN)

WEEK 4 – Capstone Project & Deployment

Topics Covered

- Advanced React components and API integration
- Application testing and debugging
- Deployment on cloud platforms (Vercel, Netlify, Render, MongoDB Atlas)
- Documentation and presentation

Major Project Options

1. E-Commerce Web Application

- Product listing, user authentication, cart, and order management.
- Admin dashboard for product control.

2. Social Media Feed Application

- User registration, post creation, likes, and comments.
- Optional: Real-time updates using WebSockets.

3. Project Management Dashboard

- Boards, lists, and task cards with drag-and-drop functionality.
- Role-based access and data persistence.

Learning Outcome

Students demonstrate full-stack proficiency and deploy their first production-level web application.
